Summary

Senior AI Architect and Full Stack Engineer with 8+ years of experience building complex software systems and 3+ years focused on LLM orchestration, RAG, AI agents, local/on-premise models, and enterprise AI platforms.

Experience

Lead AI Architect

InterProCom | Feb 2025 - Present

- Lead development of **Axioma AI**, an enterprise AI assistant platform for asset management workflows in the energy domain.
- Architected LangGraph-based multi-agent workflows for SQL, norm-control, and domain RAG pipelines.
- Deployed private local LLM infrastructure, model routing, observability, Docker-based deployment, CI/CD, and enterprise API integrations.
- Introduced context-driven development with architecture docs, global prompts, agent instructions, reusable skills, and project knowledge maintained alongside the codebase.
- **Business Impact:** Reduced manual navigation across enterprise data and documentation by up to 50% in target workflows.

Founder & Lead AI Developer

hAi, local-first AI assistant | 2024 - Present

- Solo founder of a local-first desktop AI assistant with memory, voice, tool use, activity context, and local/cloud model routing.
- Built the backend core, agent logic, MCP integrations, ActivityWatch context, SQLite/LanceDB memory, and LiveKit voice layer.
- Use the project as a practical R&D environment for local models, Mac Studio inference optimization, and agent UX.

Lead AI Engineer

BL Group R&D Center | Jun 2022 - Feb 2025

- Led **Smart Publish**, an AI-assisted publishing platform for generating, adapting, reviewing, scheduling, and publishing content.
- Designed the LLM pipeline for draft processing, channel-specific adaptation, publication metadata, CMS/social integrations, and human review.
- **Business Impact:** Reduced repetitive editorial preparation and formatting work by up to 60%.

Team Lead / Lead Software Engineer

BL-Group | Jul 2018 - Jun 2022

- Grew from Full Stack Developer to Team Lead, managing cross-functional teams of up to 10 engineers.
- Led **Urban Lighting**, an ML reconstruction platform for field inventory, mobile laboratory measurements, geospatial mapping, and LightGBM-based illuminance prediction.
- Led development processes for **Light in Night**, a professional lighting calculation and design application.
- **Business Impact:** Accelerated field data collection and processing by up to 60%, reduced repeat city survey visits by up to 70%, and removed dependency on an external map-markup contractor.

Skills

- **AI & LLM:** LangGraph, LangChain, LlamaIndex, RAG, SQL agents, multi-agent systems, MCP, local LLMs, Ollama, LiteLLM, Langfuse, prompt engineering.
- **Backend & Infrastructure:** Python, FastAPI, REST, gRPC, Docker, CI/CD, DevOps, PostgreSQL, Redis, vector databases, LanceDB, FastEmbed, OpenTelemetry.
- **Leadership:** architecture, team leadership, hiring, mentoring, product planning, Agile/Scrum/Kanban.

Education

Moscow Power Engineering Institute (MPEI) — Master's Degree, Electronics and Nanoelectronics, 2018
